DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-7, 31 have been considered but are moot in view of the new ground(s) of rejection.

Election/Restrictions

2. Applicant's election of Group I, claims 1-19, 31-34 in the reply filed on 12-20-05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

3. The elected species was an electrolyte comprising an additive comprising a sulfone-based compound of Formula (1), a C3-C30 organic peroxide of claim 7 and an organic solvent of at least one of carbonates, esters, ethers or ketones where the carbonate is cited in claim 13. Therefore, claims 1-7, 9-13, 31-34 have been examined.

4. Claims 20-30 and 8, 14-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12-20-05.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-7, 9-13, 31-34 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 3-6, 8, 14-17-24, 46-47 of copending Application No. 10/393,294. Although the conflicting claims are not identical, they are not patentably distinct from each other because Application No. 10/393,294 claims an electrolyte for a lithium battery comprising a non-aqueous organic solvent, a lithium salt and an additive comprising a compound of formula (1) and a compound selected from a sulfone-based compound, etc. Application No. 10/393,294 claims in claim 3, that the sulfone-based compound is represented by Formulas (2), (3) and (4) which corresponds to formula (1), (2) and (3) of the claimed invention.

Application No. 10/393,294 claims in claim 14, that the electrolyte further comprises an

organic peroxide and claims in claim 16 the many different organic peroxide that could be used. Application No. 10/393,294 claims in claim 17, that the electrolyte comprises an organic solvent, a lithium salt, an additive compound of formula (1), a sulfone compound, etc. and an organic peroxide and claims in claim 20 the many different organic peroxide that could be used.

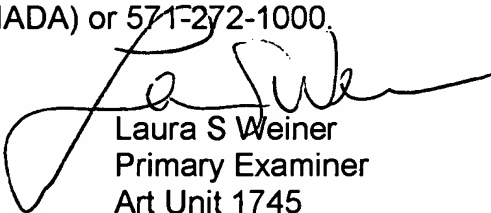

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
